

Is your home hard to heat?

If you live in a private rented property, your landlord must make sure your home is not unreasonably hard to heat. It is unlawful for landlords to let out a property with an Energy Performance Certificate rated F or G (in properties where an EPC is legally required). We can also advise landlords on grants available to help meet the cost of making improvements.

If your home seems hard to heat, come and see us at a roadshow running soon near you:
